

MTI Instruments Product Obsolescence Notice

Affected Product: Microtrak 7000 PSD Laser Triangulation System
Effective Date: November 28, 2007

To expand on our continuous improvement initiative, MTI Instruments, Inc. (MTII) is discontinuing the Microtrak 7000 effective November 28, 2007 and replaces it with our improved Microtrak II laser triangulation product line. The Microtrak II offers significant improvements in vibration and displacement measurement technology and at a substantially lower cost.

For more information on the Microtrak II product, please visit the following link:
<http://www.mtiinstruments.com/products/microtrakII.aspx>.

Additionally, a “stand alone” version of the Microtrak II system is available that does not require a controller to operate. Complete information about this product family can be found at:
<http://www.mtiinstruments.com/products/microtrakII.sal.aspx>.

Important Dates:

January 1, 2009 – End of full product support for the Microtrak 7000 including customer service, repairs and parts. Please note that parts and materials may become unavailable prior to that date due to supplier parts availability.

January 1, 2010 – End of technical applications support.

We appreciate the opportunity to continue providing our customers with world class non-contact measurement technology and regret any inconvenience this action may cause.

If you have any questions regarding this action or require information about our new Microtrak II laser triangulation system, please contact us at sales@mtiinstruments.com or call us at 518-218-2550.

Sincerely,

Ed Burgher
Sales & Marketing Manager
