Microtrak™ 3 - High Quality, Compact and Reliable Non-contact Measurement

The Microtrak™ 3 laser displacement sensor head is the ideal solution for quality and process control applications. Using the latest CMOS sensor technology, the Microtrak™ 3 precisely monitors the intensity of light received on a pixel array and optimizes itself to the sensed conditions. This makes Microtrak™ 3 ideal for even for the most difficult measurement challenges such as, black, colored, metallic, wood, ceramic, steel, or plastic surfaces.

Key Features

- **No Controller Needed** - With the built-in 5-color position indicator, there is no need for an external controller to determine the laser mounting location and attain the precise distance placement.
- **Dual Output** - Analog (0-10V) and Digital (RS-485 and USB).
- **Cut-Time Feature** - Ignore holes and cutouts with its bridging function.
- **Included Microtrak 3 Basic Software** - Intuitive and straightforward buttons makes configuring and acquiring data easy.
- **Specular and Glass Models Available** - Accurate measurement for shiny surfaces.
- **Build-up measurement in a roll**
- **Sheet metal thickness measurement**
- **Part thickness measurement**
- **Vibration measurement of motor shaft**
- **Run-out measurement**
- **Distance to pavement measurement**
- **Amplitude measurement**
- **Tire tread depth measurement**

Bundled with the Microtrak™ 3 Basic Support Software, users are presented with graphical displays of displacement signal. Acquired data can also be stored as a widely supported (.csv) format for further analysis. Compatible with Windows® XP, Vista, Windows® 7 and Windows® 8.
